

End Users, Technology Developers and System Integrators

Ramez Awad
Fraunhofer IPA

info@robotics-challenges.eu

Objectives

Objective #1: Launch and run three industrially-relevant challenges

Objective #2: Empowering robotics platforms and benchmark infrastructures

Objective #3: Sustainability and adaptability to end users

must involve End Users, Technology Developers and System Integrators

End Users

- **End Users:** Manufacturing companies, either SMEs or large Enterprises, looking for robotic solutions for their production environment.
- **Role:**
 - End User involvement ensures that the challenges **address real industrial needs**
 - End Users provide the **challenging** and **representative** use cases for the challenges
 - End Users are needed **for all 3 Challenges**
 - End User **involvement in Stage II & III** of the Challenges
 - Each Team **must** have an End Users as a member in Stage II & III
- **Call for End Users:**
 - <http://www.euroc-project.eu/index.php?id=296>
 - Deadline: **15 November 2014 at 17:00 (Brussels Time)**

Technology Developers

- **Technology Developers:** Companies or research organizations developing innovative technologies (e.g. new vision system, cloud-based control software, etc.) and looking for an application of their technology in the industrial robotics domain.
- **Role:**
 - Technology Developers **provide innovative technologies** that may be needed to implement the solution for a use case
 - Technology Developers may be drafted **for all 3 Challenges**
 - Technology Developers **involvement in Stage II & III** of the Challenges
 - Each Team **may** have Technology Developers as members in Stage II & III
- **Call for Technology Developers:**
 - <http://www.euroc-project.eu/index.php?id=307>
 - Deadline: **15 November 2014 at 17:00 (Brussels Time)**

- **System Integrators:** Companies that specialize in bringing together robotic components/subsystems, developing and commissioning whole robotic systems.
- **Role:**
 - System Integrators **combine** the knowledge regarding challenging business cases in the manufacturing industry and innovative technologies from Technology Developers
 - System Integrators involvement ensures **sustainability of the developed solutions**
 - System Integrators may only be drafted **for Challenge 1***
 - System Integrators **involvement in Stage II & III** of the Challenges
 - Teams – in Challenge 1 – **may** have one System-Integrator as a member in Stage II & III
- **Call for System Integrators :**
 - <http://www.euroc-project.eu/index.php?id=297>
 - Deadline: **15 November 2014 at 17:00 (Brussels Time)**

* For challenges 2 & 3: KUKA Systems GmbH and ALSTOM Inspection Robotics AG will act as the respective system integrators

Match-Making
